Subject: Microsoft

Let us put this to bed,enough money has been wasted,all for nothing.

I am almost 78 years old,computers are a great thing in my life,without Microsoft,I would have never learned how to use them.Bill Gates has done more for the nations around the world than any company I can think of plus all of the people that have jobs. Let this all go away and they will have more resources to develop new products for the USA and the world.Clinton is gone,so should the phony charges against Microsoft.
